GRANTED CASE STUDY

SIGMA

£171,378 GRANT RECEIVED FROM INNOVATE UK

NEW OPPORTUNITIES

Sigma is an innovation-led mechanical engineering company seeking to revolutionise the fitness and rehabilitation equipment markets by delivering world-first 3D robotic solutions to a number of global clients.

THE CHALLENGE

Sigma were looking to rapidly develop the company through a revolutionary new product, centred around delivering a fitness and rehabilitation solution that redefines current capabilities. By securing funding for this project the impact would see dramatic improvements in rehabilitation approaches through bespoke, 360 degree exercise machines and optimisation of data gathering for fitness users.

GRANTED'S APPROACH

Granted approached this project by:

1. Gaining a deep understanding of the clients plans to manage expectations for both parties
 2. Researching the available funding for the proposed project to maximise the likelihood for success
 3. Preparing a comprehensive Grant Portfolio to enable clients to consider all options available
 4. Developing and submitting unique grant applications
-

Granted worked really quickly to produce a great application for a technically complex project. Being awarded the funds has helped us move forward much quicker than anticipated – many thanks to Tom, Will and the rest of the team

CONCLUSION

Sigma entered the Innovate UK open competition and were successful in securing £171,378, allowing them to start achieving their goals of revolutionising the fitness and rehabilitation equipment market.

The funding will pay for a dedicated engineering and software team, materials and sub-contractors that will enable the development of a world-first prototype.

OUR SUCCESS

We have never failed to secure more money in grants, than we have charged in fees when working with an organisation on a defined multi-grant funding plan.
