**FASTR PROPERTY LTD**

£330K GRANT RECIEVED FROM INNOVATE UK

## NEW OPPORTUNITIES

Fastr is a leading, UK based, PropTech provider that is seeking to develop a world first autonomous residential development ecosystem. The companies vision is to stream-line the approach to building for SME developers and supporting supply chains; democratising functionality and taking a pioneering technical skillset and provision to the global property market.

## THE CHALLENGE

The R&D project that was defined focused on the development of a cloud-based property ecosystem that would have the ability to enable new markets & accelerate the entire process of residential new build developments.

To successfully develop their advanced property ecosystem, Fastr required grant funding to increase their chances of disrupting the market and having long term user retention.

## GRANTED'S APPROACH

Granted approached this project by:

1. Gaining a deep understanding of the clients plans to manage expectations for both parties
2. Researching the available funding for the proposed project to maximise the likelihood for success
3. Preparing a comprehensive Grant Portfolio to enable clients to consider all options available
4. Developing and submitting unique grant applications

We first met Mo (Fastr CEO) at a funder / founder event we hosted in London where we spoke about matching his exciting project with grant funding opportunities. It has been great to work with the Fastr team and secure them the funding they need to bring this innovative product to market.

Will Granger

Senior Consultant at Granted Consultancy

## CONCLUSION

Successful in the Innovate UK open competition, FastR secured £330k of grant funding. This funding will help them to become a world leading company in the PropTech market with their innovative software platform.

Grant funding has definitely fast-tracked both the development of our platform and the leveraging of external investment into FastR. We continue to work with the Granted team on further projects.
